Project Idea:

An Application for money management where the user will input his monthly salary and all of his monthly bills.

We will make a separate tab for Monthly Subscriptions (Running Water, Electricity, Subscriptions for Music & Movies etc...)

The app will also have different tabs for daily spendings, the user will be able to customise those, adding and removing any tab whenever he wants.

There will be a default Remaining Tab so that the user will be able to see the remaining money of his budget after spendings.

All the inputs will be dated and organised on dates.
